Attention: Mike and Colleen

I am writing you today to express our thanks for yet another job well done by your team!  
The job you did is truly fantastic, from the beautiful pine doors to the custom island and valence trim.  
It was great to have your team commit to the complete install and extras like installing under cabinet outlets / plugs and working with the existing hardwood to ensure the job looked perfect. What a refreshing change to have a high quality job done on time and within your committed estimate, and a refreshing change to not be nickled to death by little extras (like cutting in the double sink).

Please use this reference and have any customers call to discuss the 5 projects you've since done for us, including small jobs like bookshelves to large projects like the 36' of kitchen cabinets that your team installed in our Toronto area home.  
Thanks again...
